Sphere report – Alfrick and Lulsley PC.

A and L PC completed a local survey of residents at the end of August. There was a good response and the PC wish to thank all those who contributed.

Cllr Glazzard is collating the responses and will be reporting the results to the councillors in the coming weeks. The results will also help to shape the PC's local planning policy document.

However, the survey is not the only time that parish councillors would be interested to hear from local residents. Comments and contributions are always welcome at clerk@alfrickandlulsleypc.co.uk.

At the PC meeting on the 10th September councillors considered how the new boule/pétanque court was performing and suggestions on improvements.

The court has been a good addition to the recreational and social opportunities for local residents. Free to use, like the tennis court, playing field and play area. And pétanque is a very sociable activity. You only have to turn up at the regular social sessions on Saturday mornings to find out.

The pc will be considering specific improvements to the facility at a future meeting – these could include a harder surface, more level grassed area and an accessible path to the court itself. If you have any further suggestions please contact the clerk.

Finally, the PC were pleased to note that works had been carried out to clear drainage paths from the flooding area on the Knightwick Road at Alfrick Court. The County Council and the Parish Council's Lengthsman have worked hard to improve matters and we hope that this winter will see a lot less flooding here.

The next meeting of the PC will be on the 8th October – 7pm at Alfrick Village Hall.
